

April 2024

Technology and Lexia Changes (Year 7 & Year 8)

Dear Families,

As we enter the third cycle of this academic year, there are some small changes being made to the curriculum for Year 7 and Year 8 technology. Students will continue to study technology but one lesson per week is to be used, to support students with their literacy using an online platform called 'Lexia'.

Lexia is an adaptive system which provides students with a personalised learning experience, along with instant feedback to the tasks which they complete online. As I am sure you will appreciate, excellent literacy has the potential to be something which can maximise outcomes in all subject areas, so we see this as an excellent opportunity for our students to support improvement in all areas of the curriculum.

If you have any questions please contact the school reception in the first instance.

Yours faithfully

Paul Murray
Vice Principal
