

March 2025

Dear Year 10 Students and Families,

Maths Enrichment Day

We are excited to announce an upcoming Maths Enrichment Day on March 18th, designed to enhance students' understanding of how mathematics is applied in everyday business life.

On this day, half of the year group will visit Bradford city centre to explore a variety of local businesses and observe how they use mathematics in their daily operations. They will also conduct research on the Bradford Clean Air Drive, using statistics to assess whether Bradford is truly environmentally friendly and what measures have been taken to reduce emissions.

Meanwhile, the other half of the year group will remain in school, participating in practical mathematical workshops aimed at developing essential skills. Midway through the day, both groups will switch activities.

Attendance for this enrichment day is compulsory, as it provides a unique and valuable learning experience that directly supports students' education. It will also give them the opportunity to demonstrate our school values of resilience and integrity, helping them build confidence in new and unfamiliar situations.

There is no cost for this event, and attendance is essential to ensure students do not miss out on this valuable learning opportunity.

Key Information:

- **Uniform:** Students must wear full school uniform and bring a coat to prepare for any weather changes.
- **Equipment:** Students should bring their usual morning meeting equipment.
- **Lunch:** Lunch will be provided for students who normally receive school meals.
- **Travel:** The visit includes a short walk from school to Bradford city centre. Students should wear their usual school footwear.

We look forward to an exciting and enriching day for all Year 10 students.

If you have any questions, please do not hesitate to email HMahmood@dixonsma.com.

Thank you for your support in ensuring your child's participation.

Yours faithfully,

Mrs H Mahmood
Head of Mathematics
